

APS Consulting

*Another innovation, **u**ltimate success*

IoT – Big Data - AI

IoT - The Internet of Things

IoT: The Internet of Things, a vast network of sensors and smart devices combined with advanced analytics and cloud services—promises to augment many industry sectors. APS works with customers to understand and unlock the value of IoT, and we also help IoT and Analytics vendors focus their resources and determine which battlegrounds they can most effectively compete on. Our expertise encompasses the full spectrum of IoT, from sensors, connectivity and lifecycle management to IoT platform analytics, security, applications and services.

Data Discovery, Analysis & Interpretation

APS data analytics consultants leverage and utilize proven methodologies, best practices and tools. Our aim is to deliver the right analytics solutions for you and your business, solutions designed to solve your business challenges and drive growth.

Data Modeling

APS data modeling experts work with clients to create a complete data architecture road map that is foundationally based on best practices, industry standards and latest proven techniques.

AI - Machine Learning Experts

Machine learning is a type of artificial intelligence (AI), designed and developed to enable computer programs to have the ability to learn without being programmed. With pre-trained models and a service to generate your own tailored models, we offer clients both expertise and choice, ensuring that your solutions are fast, scalable, and easy to use.

Our team of machine learning experts leverage these technologies through strategic experiments. connecting historical data to predictive analytics engines to deliver solutions, and results.
